## **DETAILED ACTION**

## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 3-10 and 13-24, drawn to a modification of the memory of an scanner having a 1 dimensional scanning array and 2D sensors, classified in class 235, subclass 462.25.
- II. Claims 25-32, drawn to a method of operating a scanner, classified in class235, subclass 462.45.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility in that the use of two different sensors can be achieved not only by modifying the memory of an existing scanner but by instructions in an adjacent computer system for example. See MPEP § 806.05(d).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2876
